Felicitas Private Markets Fund Notes to Consolidated Schedule of Investments March 31, 2025 (Unaudited)

1. Fair Value — Definition and Hierarchy

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

All investments in securities are recorded at fair value. The Fund uses a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value, defined in FASB ASC 820, Fair Value Measurements. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The fair value hierarchy is categorized into three levels based on the inputs as follows:

Level 1 — Unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access.

Level 2 — Inputs, other than quoted prices included in Level 1, that are observable either directly or indirectly. These inputs may include: (a) quoted prices for similar assets in active markets; (b) quoted prices for identical or similar assets in markets that are not active; (c) inputs other than quoted prices that are observable for the asset; or (d) inputs derived principally from or corroborated by observable market data by correlation or other means.

Level 3 — Inputs that are unobservable and significant to the entire fair value measurement.

Investments in private investment funds measured using net asset value as practical expedient are not categorized within the fair value hierarchy.

Fair value is a market-based measure, based on assumptions of prices and inputs considered from the perspective of a market participant that are current as of the measurement date, rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, the Fund's own assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date.

The availability of valuation techniques and observable inputs can vary from investment to investment and are affected by a wide variety of factors, including the type of investment, whether the investment is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the transaction. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Because of the inherent uncertainty of valuation, those estimated values may be materially higher or lower than the values that would have been used had a ready market for the investments existed. Accordingly, the degree of judgment exercised by the Fund in determining fair value is greatest for investments categorized in Level 3. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy in which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement.

2. Fair Value — Valuation Techniques and Inputs

The Fund calculates its NAV as of the close of business on the last day of each quarter and at such other times as the Board may determine, including in connection with repurchases of Shares, in accordance with the procedures described below or as may be determined from time to time in accordance with policies established by the Board.

For purposes of calculating NAV, portfolio securities and other assets for which market quotations are readily available are valued at market value. A market quotation is readily available only when that quotation is a quoted price (unadjusted) in active markets for identical investments that the Fund can access at the measurement date, provided that a quotation will not be readily available if it is not reliable.

Investments for which market quotations are not readily available are valued at fair value as determined in good faith pursuant to Rule 2a-5 under the 1940 Act. As a general principle, the fair value of a security or other asset is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Pursuant to Rule 2a-5, the Board has designated the Investment Adviser as the valuation designee ("Valuation Designee") for the Fund to perform in good faith the fair value determination relating to all Fund investments, under the Board's oversight. The fair values of one or more assets may not be the prices at which those assets are ultimately sold and the differences may be significant.

The Fund values its investments in private Investment Funds (generally private funds that are excluded from the definition of "investment company" pursuant to Sections 3(c)(1) or 3(c)(7) of the 1940 Act). In accordance with the Fund's valuation procedures (the, "Valuation Procedures"), fair value as of each quarter-end or other applicable accounting periods, as applicable, ordinarily will be the value determined as of such date by each private Investment Fund in accordance with the private Investment Fund's valuation policies and reported at the time of the Fund's valuation. As a general matter, the fair value of the Fund's interest in a private Investment Fund will represent the amount that the Fund could reasonably expect to receive from the private Investment Fund if the Fund's interest was redeemed at the time of valuation, based on information reasonably available at the time the valuation is made and that the Fund believes to be reliable. The Fund will determine the fair value of such private Investment Fund based on the most recent final or estimated value reported by the private Investment Fund, as well as any other relevant information available at the time the Fund values its portfolio.

The Valuation Procedures require the Valuation Designee to take reasonable steps in light of all relevant circumstances to value the Fund's portfolio. The Valuation Designee will consider such information and may conclude in certain circumstances that the information provided by an Underlying Manager does not represent the fair value of the Fund's interests in the Investment Fund. The Investment Adviser will consider whether it is appropriate, in light of all relevant circumstances, to value such interests at the NAV as reported by the Underlying Manager at the time of valuation, or whether to adjust such value to reflect a premium or discount to NAV. In accordance with U.SGAAP and industry practice, the Fund may not always apply a discount in cases where there is no contemporaneous redemption activity in a particular Investment Fund. In other cases, as when an Investment Fund imposes extraordinary restrictions on redemptions, when other extraordinary circumstances exist, or when there have been no recent transactions in Investment Fund interests, the Fund may determine that it is appropriate to apply a discount to the NAV of the Investment Fund. Any such decision will be made in good faith, and subject to the review and supervision of the Board.

The Valuation Procedures provide that, where deemed appropriate by the Valuation Designee and consistent with the 1940 Act, investments in Investment Funds may be valued at cost. Cost will be used only when cost is determined to best approximate the fair value of the particular security under consideration. For example, cost may not be appropriate when the Fund is aware of sales of similar securities to third parties at materially different prices or in other circumstances where cost may not approximate fair value (which could include situations where there are no sales to third parties). In such a situation, the Fund's investment will be revalued in a manner that the Valuation Designee, in accordance with the Valuation Procedures, determines in good faith best reflects approximate market value.

Debt securities will be valued in accordance with the Valuation Procedures, which generally provide for using a third-party pricing system, agent, or dealer selected by the Valuation Designee, which may include the use of valuations furnished by a pricing service that employs a matrix to determine valuations for normal institutional size trading units. The Valuation Designee will monitor periodically the reasonableness of valuations provided by any such pricing service. Debt securities with remaining maturities of 60 days or less, absent unusual circumstances, will be valued at amortized cost, so long as such valuations are determined by the Valuation Designee to represent fair value.

Securities for which the primary market is a national securities exchange are valued at the last reported sales price on the day of valuation. Listed securities for which no sale was reported on that date are valued at the mean between the most recent bid and asked prices. Securities traded on the over-the-counter market are valued at their closing bid prices.

Assets and liabilities initially expressed in foreign currencies will be converted into U.S. dollars using foreign exchange rates provided by a pricing service. Trading in foreign securities generally is completed, and the values of such securities are determined, prior to the close of securities markets in the United States. Foreign exchange rates are also determined prior to such close. On occasion, the values of securities and exchange rates may be affected by events occurring between the time as of which determination of such values or exchange rates are made and the time as of which the NAV of the Fund is determined. When such events materially affect the values of securities held by the Fund or its liabilities, such securities and liabilities may be valued at fair value as determined in good faith in accordance with procedures approved by the Board.

3. Fair value measurements

The Fund's assets recorded at fair value have been categorized based upon a fair value hierarchy as described in the Fund's significant accounting policies in Note 2. The following table presents information about the Fund's assets measured at fair value as of March 31, 2025:

			Investments Measured at Net Asset				
Assets (at fair value)	Level 1	Level 2		Level 3	Value ⁽¹⁾		Total
Common Stocks	\$ 337,181	\$ 	\$		\$	\$	337,181
Debt Instruments		_		6,121,531	5,000,000		11,121,531
Private Investment Funds	_	_		2,806,029	84,728,816		87,534,845
Private Operating Companies	_	_		2,634,449	62,745		2,697,194
Loans	_	_		12,474,920	_		12,474,920
Short-Term Investments	2,715,481	_		_	_		2,715,481
Total	\$ 3,052,662	\$	\$	24,036,929	\$ 89,791,561	\$	116,881,152

⁽¹⁾ These investments are presented for reconciliation purposes and are not required to be categorized in the fair value hierarchy since they are measured at net asset value, without adjustment, as permitted as a practical expedient.
